**NOTE:** The following codes correspond to the appropriate models.  
E3 for U.S.A., EA for Australia, EC for Canada  
This Service Manual is prepared based on E2 for Black Version.

For United Kingdom model only.

**WARNING:**

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows:

The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.  
The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.

The wire which is coloured BROWN must be connected to the terminal which is marked with the letter L or coloured RED.

**IMPORTANT**

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral  
Brown: Live

For Australia model only.

**FOR YOUR SAFETY**

To ensure safe operation the three-pin plug supplied must be inserted only into a standard three-pin power point which is effectively earthed through the normal household wiring.

Extension cords used with the equipment must be three-core and be correctly wired to provide connection to earth. Wrongly wired extension cords are a major cause of fatalities.

The fact that the equipment operates satisfactorily does not imply that the power point is earthed and that the installation is completely safe. For your safety, if in any doubt about the effective earthing of the power point, consult a qualified electrician.

For U.S.A. and Canada models.

**CAUTION**

TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

**Video Input Function**

The PMA-700V provides a video input function. The image selection circuitry gives preference to VIDEO-1 for all settings of the INPUT SELECTOR button, unless VIDEO-2 has been specified.

This function might be used, for example, to watch a TV monitor while playing a compact disc. In this case it would connect the image input circuitry of the VIDEO-1 terminal to the image output of a video recorder, tape recorder, or video disc recorder. The resultant monitor out signal would be sent to the TV monitor, for "background video" audio-visual entertainment combining sound and images.

**Note:**

Please note the following differences in the markings on the front and back panels on the European models:

VIDEO-1	→ AUX/VIDEO 1
VIDEO-2	→ AUX/VIDEO 2
TUNER/AUX → TUNER	

In addition, there is no AV mark on the front panel.

**REMOVAL OF EACH SECTION**  
 (When assembling, do reversely as to disassembling.)

**1. Removal of Top Cover**

- Remove 8 screws and detach the top cover as per arrow in Fig. 2.

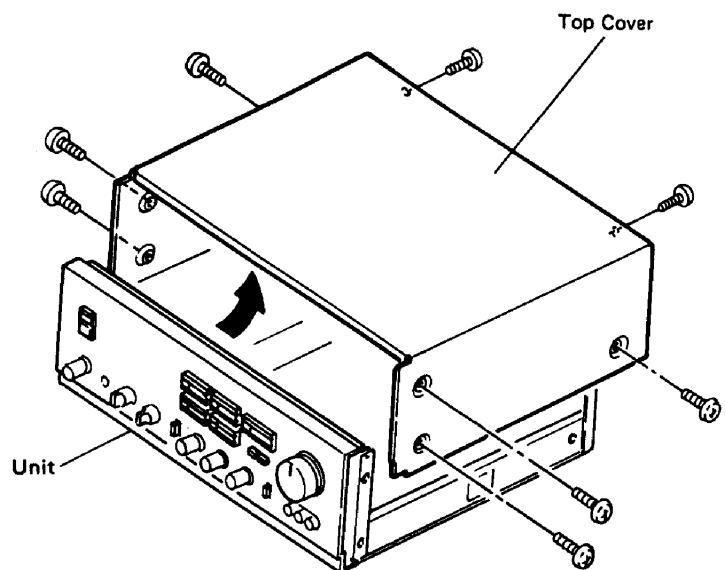

Fig. 2

**2. Removal of Back Panel**

- Remove 3 screws (A) and 7 screws (B) as per Fig. 3. Also remove screw (C) and detach back panel from the unit.

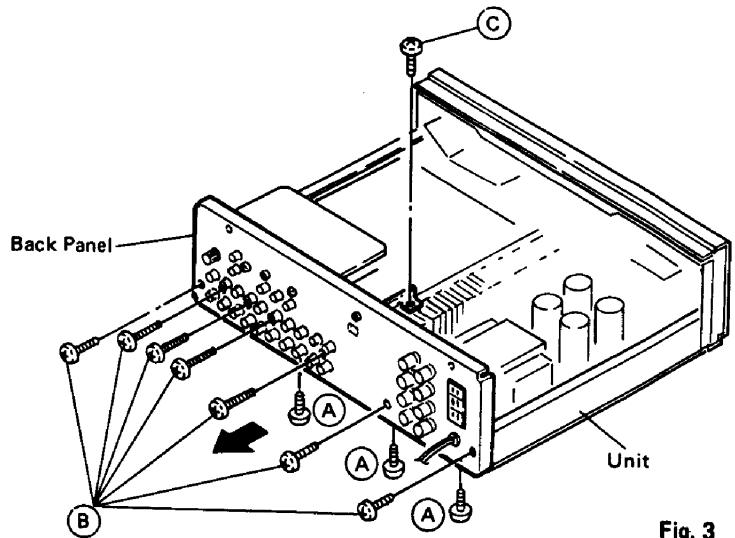

Fig. 3

**3. Removal of Front Panel Ass'y**

- Remove 4 screws (D) and remove 2 screws (E). And draw out front panel ass'y.

## CONNECTIONS

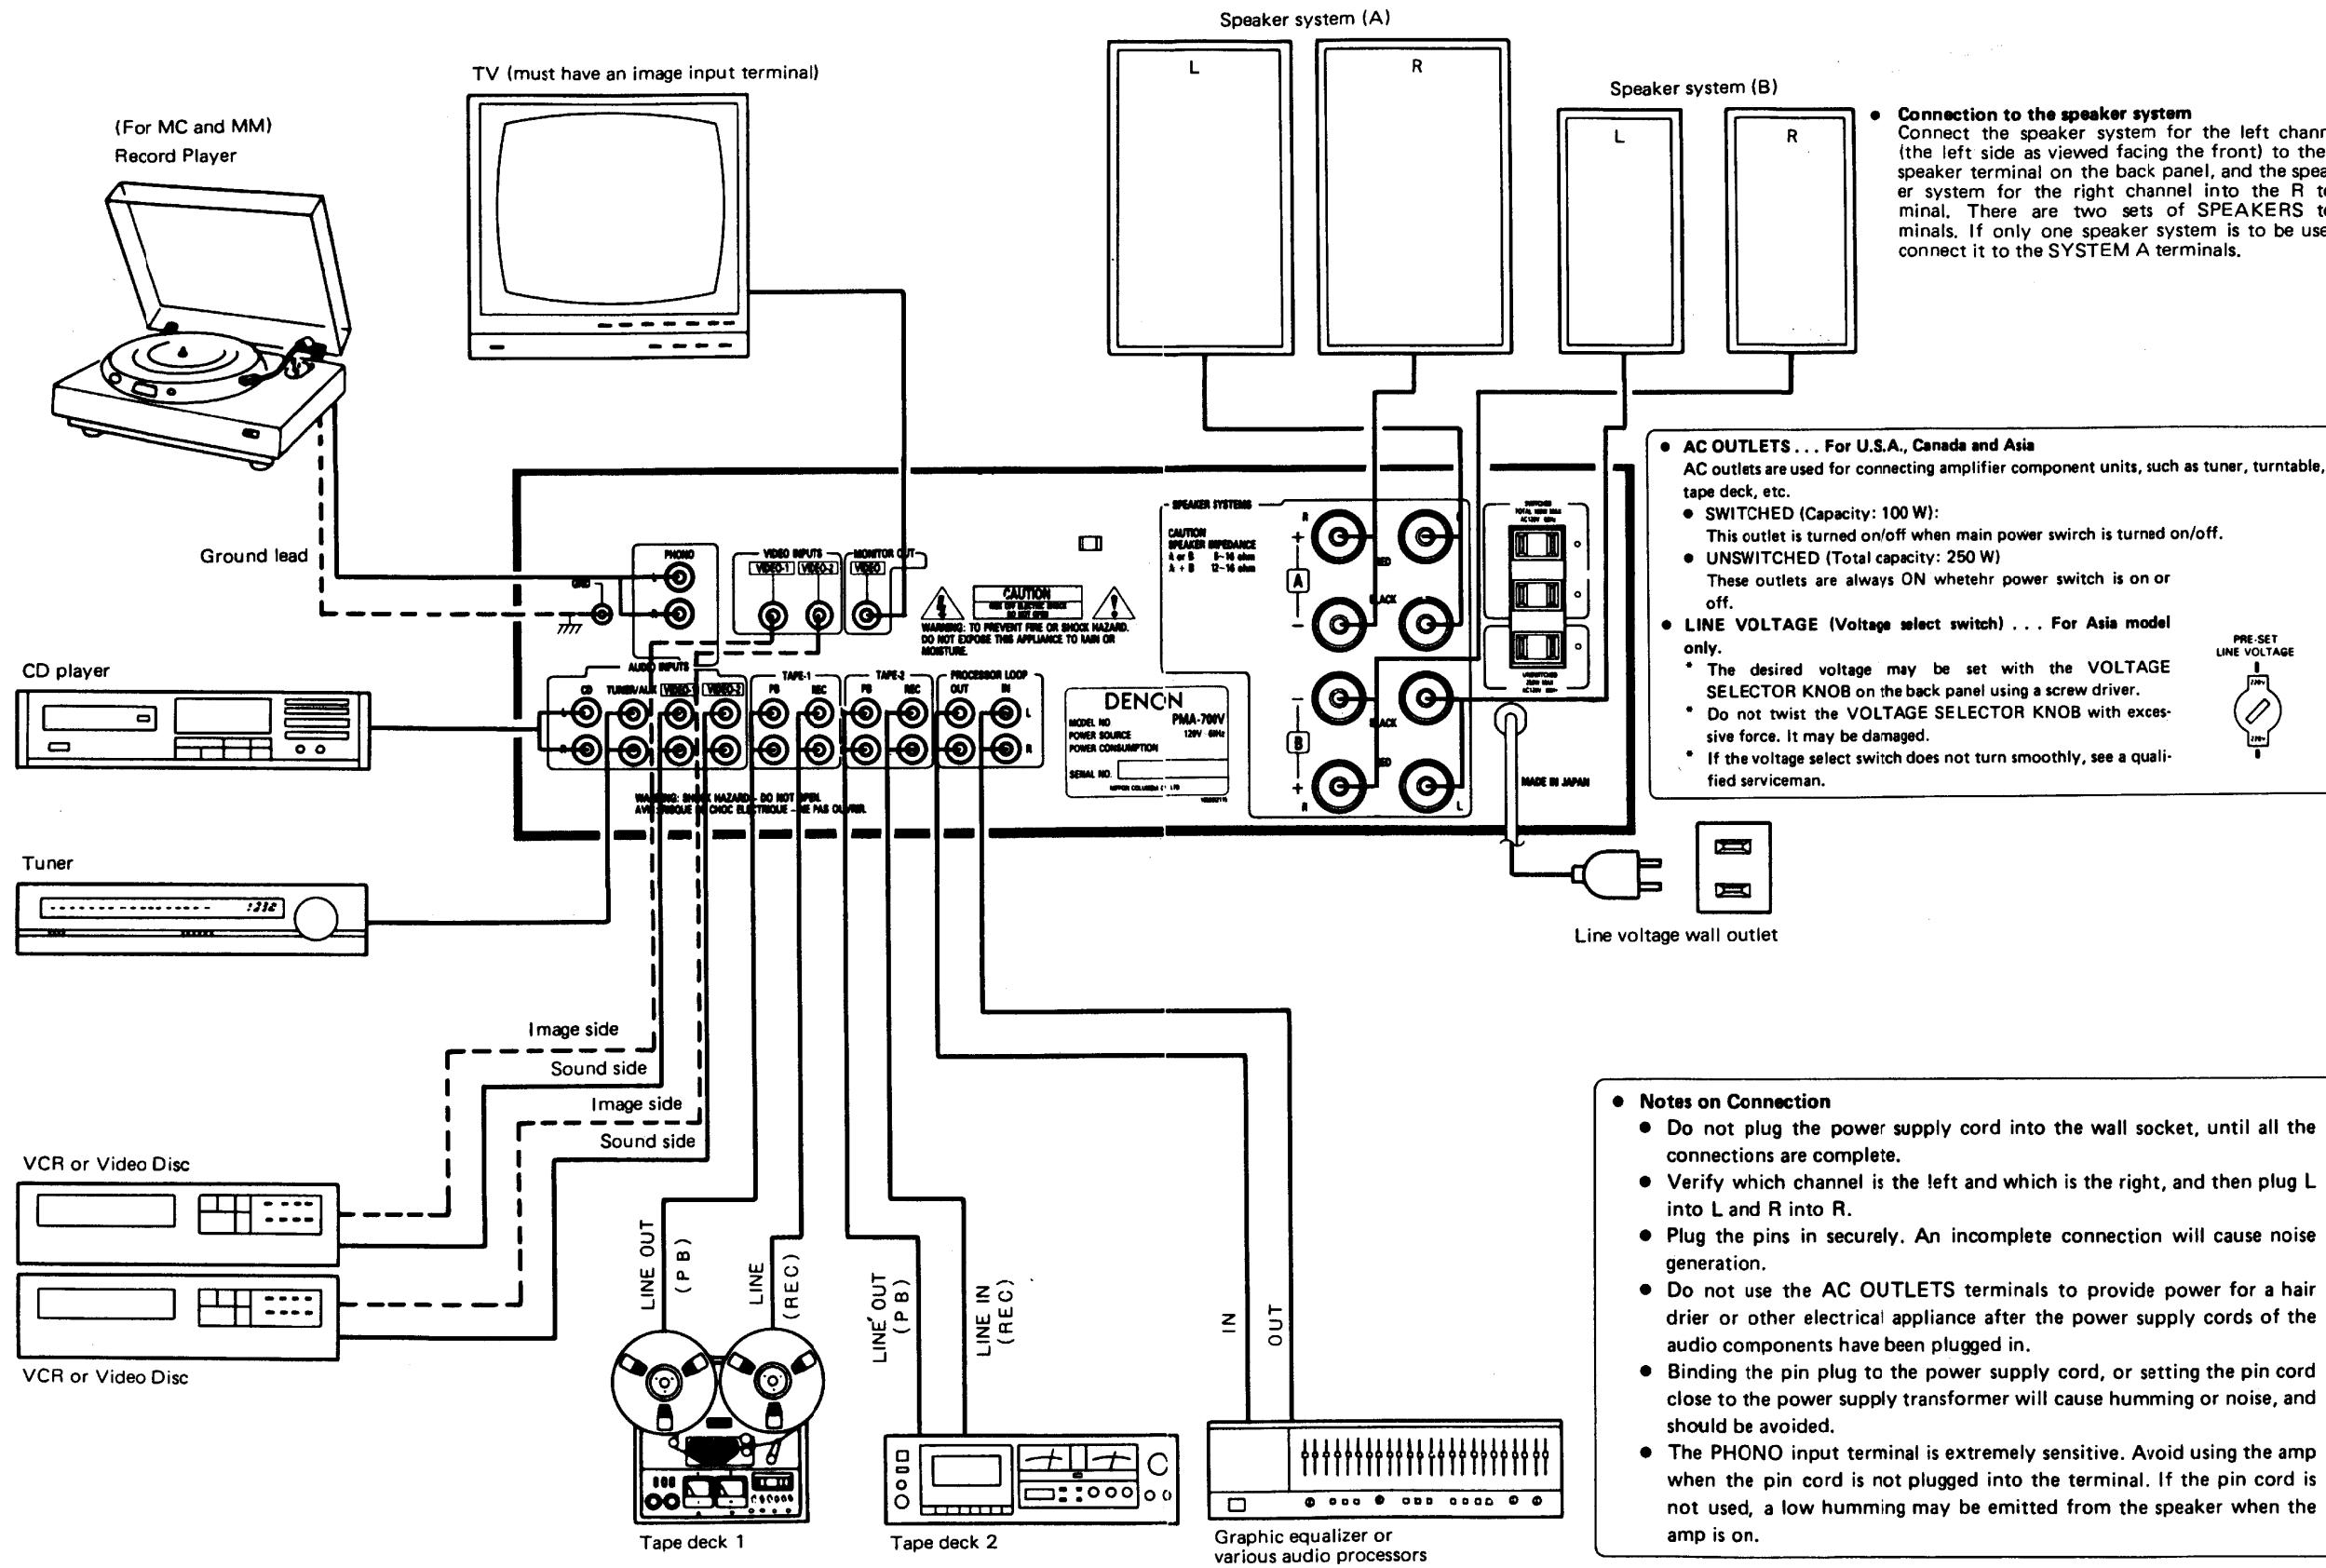

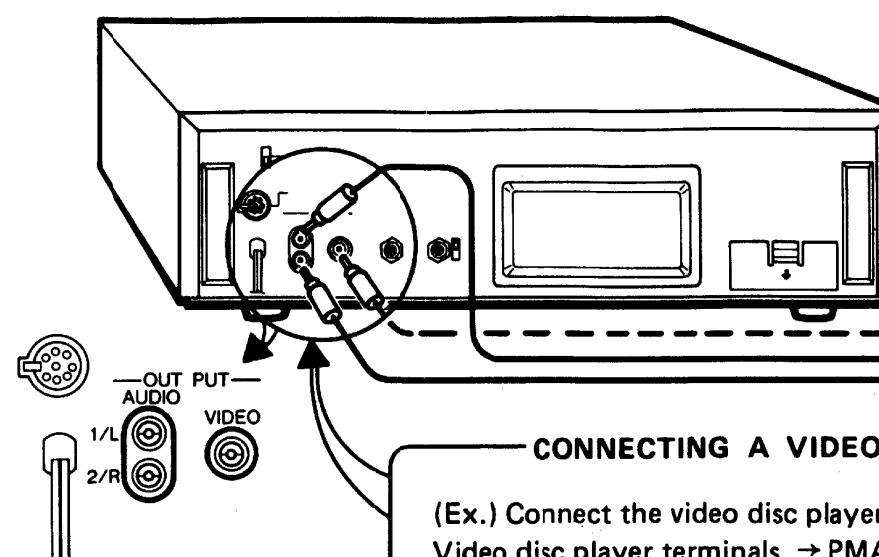

Fig. 5

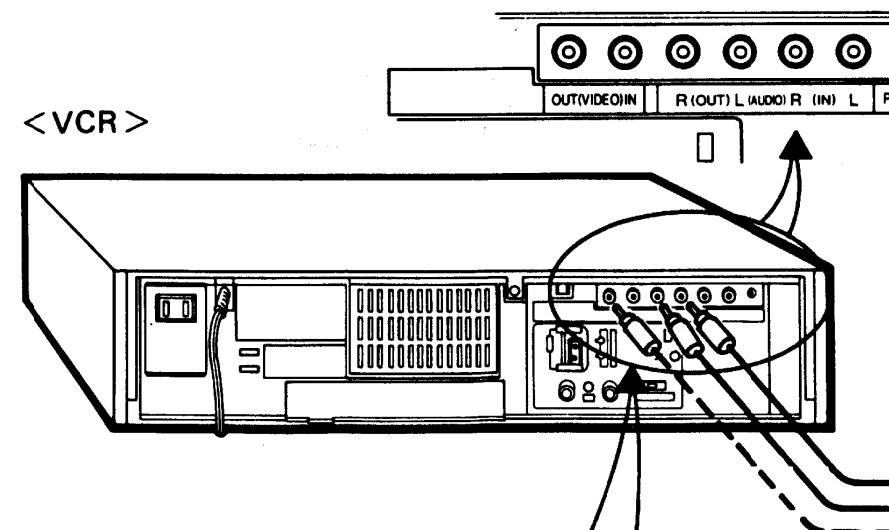

● Connecting a video device

Connect the output terminals of the video device (OUTPUT) to the VIDEO terminals of the amp, using a pin plug cord.

< Video Disc Player >

< VCR >

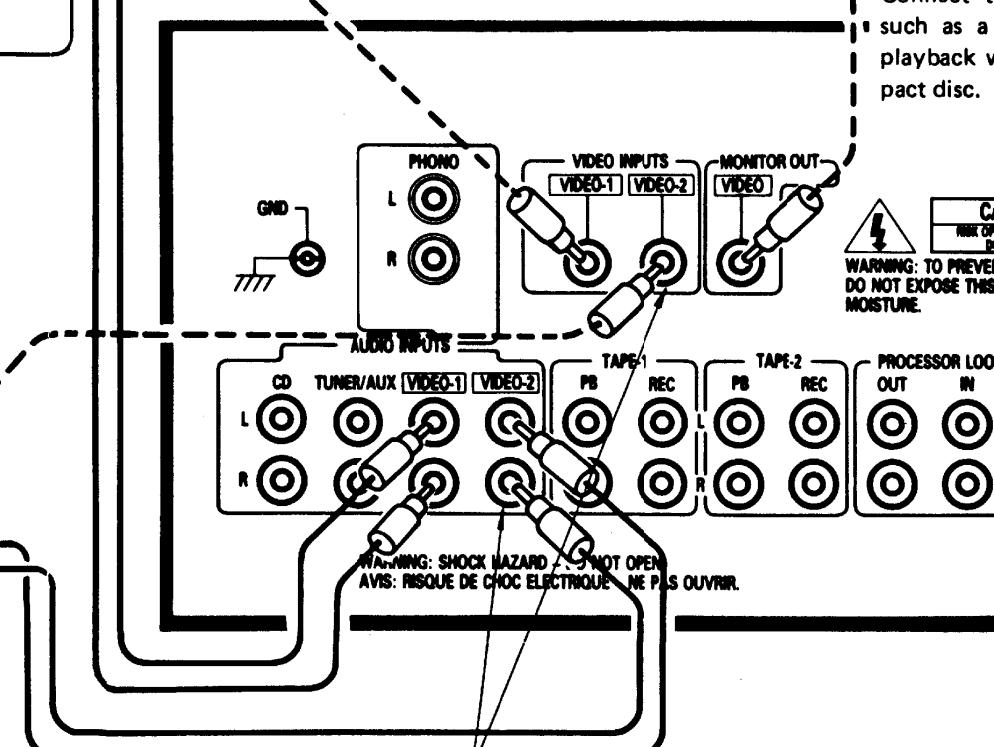

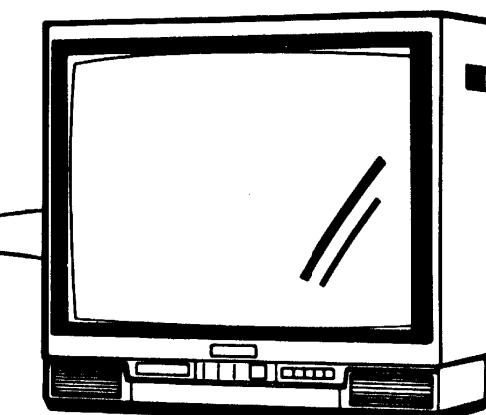

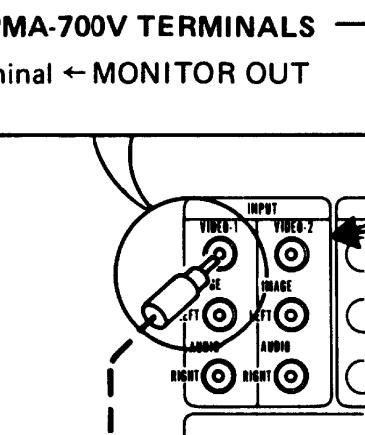

● CONNECTING A VIDEO DEVICE

< TV (must have image input terminal) >

TV TERMINALS → PMA-700V TERMINALS

Video image output terminal ← MONITOR OUT

Note:

The VIDEO-2 terminal is connected in parallel with a terminal on the front side of the panel. Either this terminal or the one on the front panel can be used to make the connection. Improper operation will result if both are connected and used at the same time.

## METHOD OF ADJUSTMENTS

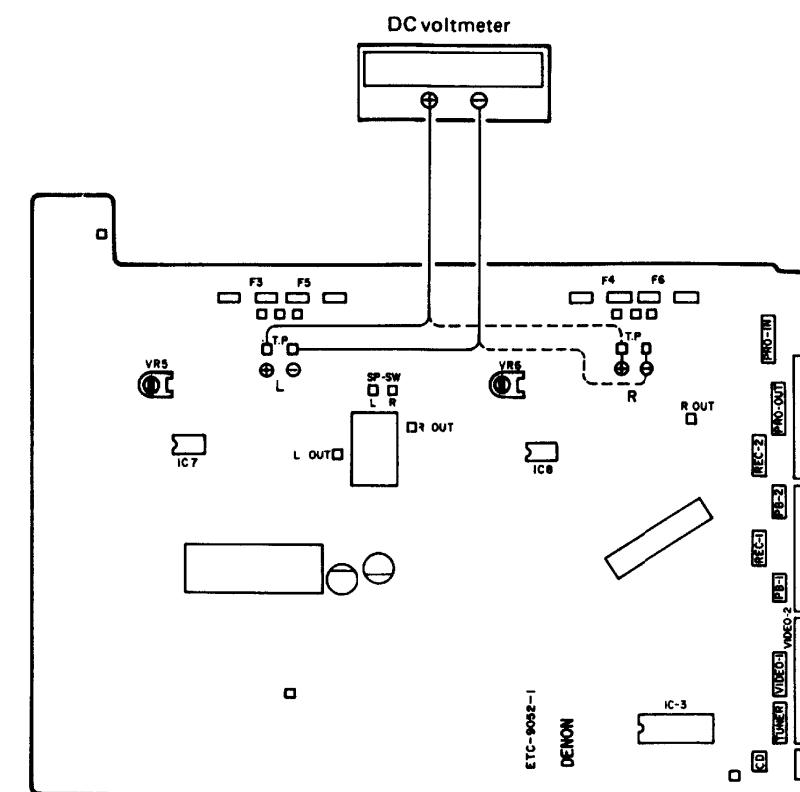

Fig. 8

## IDLING CURRENT

## ● Setup

1. Lay the unit at an ordinary position away from a direct current from a cooler or fan. Do the adjustment at a temperature between 15°C and 30°C.
2. Set controls as follows.  
POWER SWITCH → off (■)  
VOLUME CONTROL → fully counterclockwise (○ min)  
SPEAKER Terminals → open: do not connect the speakers, dummy load etc.

## ● Adjustment

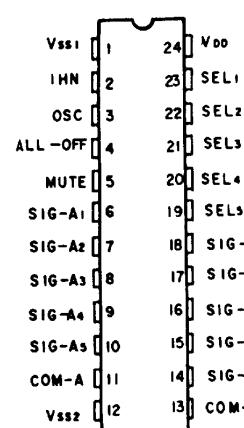

1. Remove Top cover. And then connect DC Voltmeter to Test points of ETC-9052-1 (INPUT & POWER Unit).
2. Connect Power cord to AC outlet, and turn Power Switch "on" ( ). Within 10 seconds turn VR5 (Lch) and VR6 (Rch) clockwise so that the DC voltmeter reads.  
 $0.4 \pm 0.1$  mVDC
3. Then after 5 minutes warmup adjust VR5 and VR6 so that the DC Voltmeter reads.  
 $5 \pm 0.5$  mV
4. And after 15 minutes warmup adjust VR5 and VR6 so that the DC Voltmeter reads.  
 $8 \pm 3$  mV

**1. Component parts**

Parts marked with and/or shading in this service manual have special characteristics important to safety. Be sure to use the specified parts for replacement.

**2. Leakage current**

Before returning the appliance to customer, test the leakage current when the power plug is connected. Use a calibrated (with an error of not more than 5%) leakage current tester and measure the leakage current from any exposed metal to the earth ground. Reverse the power plug polarity and test the above again.

Any current measured MUST NOT EXCEED 0.5 miliamps. Corrective measure must be taken if it exceeds the limit.

**CAUTION**
